RECEIVED

RE: Johnson Utilities, L.L.C.: Compliance with Decision No. 68237  
ACC Docket No.: WS-02987A-04-0288  
Johnson Utilities Well List with Arsenic Concentration

Dear Mr. Bozzo:

Pursuant to the above-referenced matter, Johnson Utilities hereby submits this compliance filing in accordance with the Commission's orders. Enclosed please find the Johnson Utilities Well List, attached hereto as Attachment No.1, which shows one well that is above the new arsenic standard. The most current test data on well #55-582085 has a reading of 22 micrograms per liter. The well is not currently "in use" and Johnson Utilities has committed to retest the well in January 2006 before it is placed back in service. The described arsenic plan given to ADEQ, and the ACC in a previous application, explains that Johnson Utilities will discontinue the use of this well permanently if it does not meet the new arsenic standards for drinking water. The well in question is a very low flow production well and will not impact the overall ability of Johnson Utilities to provide safe and reliable potable water.

If you need any additional information in regards to this compliance item, please do not hesitate to contact me. Thank you for your time and consideration in this matter.

Sincerely,

Daniel Hodges  
Johnson Utilities, LLC
